1 L PE Dosing bottle	20×1 L
5 L PE drum	4×5 L
50 mL, 100 mL, 200 mL, 250 mL	

CHEMICAL COMPOSITION:

60% Ethyl Alcohol, 10% Isopropyl Alcohol, Moisturizing and softening agents and excipients

PRODUCT SPECIFICATIONS:

It is a hand and skin antiseptic which contains alcohol, is applied on hands and skin and has a short-time action. It provides the most effective and quick antiseptics of the contaminant bacteria and other microorganisms on hands with its alcohol based structure. It softens and protects the skin. It is dermatologically tested.

AREAS OF USE:

BIORAD DERM is used any place where health care is provided for the hygienic and surgical hand and skin antiseptics such as clinics, operating rooms, intensive care units, laboratories, dentist examination rooms, patient care at home. It is used as an aid in prophylaxis against infection in all fields of food production and processing industry and in physicians' clinics.

USE:

For Hygienic hand antiseptics; 3-5 ml Derm solution is handled and applied by rubbing until the hands get dry for 30 seconds as per EN 1500 standard. For Surgical hand antiseptics; 5 ml of hand antiseptic is handled and applied on wrist and elbows until it gets dry for 3 minutes.

ANTI-MICROBIAL CHARACTERISTICS:

Bactericide (including methicillin and vancomycin resistant), Fungicide, Virucide, Antimycobacterial, Tuberculocide
